Portfolio

Bangalore, India

EXPERIENCE

Vaaree

Aug 2023 - Present

Bangaluru

Senior Software Engineer

- Architected and built **Settlers**, an automated vendor settlement platform handling payouts, invoices, GST reports, refunds, and reconciliation workflows, reducing manual finance effort by **80%**
- Co-developed **Solomon**, a centralized Product Information Management platform enabling catalog creation, audit tracking, master data management, and Shopify synchronization using React, TypeScript, Ruby on Rails, and PostgreSQL
- Built **Forge**, a vendor-facing platform providing self-service access to orders, invoices, settlements, GST reports, and payment history through role-based access controls
- Contributed to migration from monolithic systems to a distributed architecture across **20+ microservices**, working on order, checkout, cart, catalog, wallet, finance, CMS, and customer services
- Owned development of core commerce workflows including cart, checkout, payment orchestration, promotions, wallet integration, shipping calculations, and order creation for Vaaree's next-generation storefront
- Improved observability using Grafana, OpenTelemetry, Sentry, Kafka, Redis, Docker, Kubernetes, Terraform, and GCP.
- Mentored junior engineers through code reviews and implementation guidance.

EATCLUB Brands (BOX8)

Jul 2022 - Aug 2023

Bangalore

Software Engineer

- Led development of Vendor Management and Asset Management systems used by operations teams
- Designed scalable backend services and optimized PostgreSQL schemas supporting operational growth
- Implemented New Relic monitoring and performance optimizations across production APIs

UpGrad

Aug 2021 - Jul 2022

Bangalore

Software Engineer

- Developed scalable REST APIs for learning and content delivery platforms serving thousands of concurrent users
- Implemented Redis caching and indexing strategies, reducing API response times by **70%**

GlobalLogic (Hitachi Group)

Nov 2020 - Jul 2021

Noida

Software Engineer

- Developed and tested REST APIs for an enterprise insurance policy management platform
- Optimized database queries and backend workflows to improve performance and reliability

SKILLS

- **Languages:** Ruby, JavaScript, TypeScript, Java, SQL
- **Backend:** Ruby on Rails, Node.js, REST APIs, GraphQL, Sidekiq
- **Frontend:** React.js, TypeScript, JavaScript
- **Databases:** PostgreSQL, MongoDB, Redis
- **Distributed Systems:** Microservices, Kafka, Event-Driven Architecture, Webhooks
- **Cloud & DevOps:** Docker, Kubernetes, Terraform, AWS, GCP
- **Observability:** Grafana, OpenTelemetry, Sentry, New Relic

EDUCATION

B.Tech, Information Technology

College of Technology, Pantnagar

2016 - 2020
